### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 14 July 2006.
- 2a) ☒ This action is **FINAL**.                      2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Dutton in view of Norsic. Regarding claims 1 and 2 Dutton US 3,796,331 teaches a system for handling debris comprising:

a vehicle (4) having a bed (98) for receiving refuse;

a means (22) for grasping refuse from a polymer container and place it in said bed;

wherein said vehicle includes an arm (87) to reach over and into said container.

Dutton does not teach the system as using a steel container. Norsic (previously cited website) teaches a variety of steel container that are less than 6 feet tall, less than 9 feet long and less than 6 feet wide. It would have been obvious to one of ordinary skill in the art, at the time of invention to provide the system taught by Dutton with a steel container as taught by Norsic in order to allow the container to better stand up under repeated loadings and unloading of debris.

Regarding claim 3 Dutton teaches a method of removing refuse comprising the steps of:

providing a polymeric container for refuse;

periodically picking up said refuse via a truck with a bed and hydraulic grapple;

Art Unit: 3652

wherein said refuse is grasped by said grapple and placed into said truck.

Dutton does not teach providing a steel container. Norsic teaches providing a steel container to store construction debris and a truck to empty said container. It would have been obvious to one of ordinary skill in the art, at the time of invention to modify the methods taught by Dutton with those taught by Norsic in order to provide a system with longer lasting components.

### ***Response to Amendment***

The amendments filed on July 14, 2006 have been entered into the record.

### ***Response to Arguments***

Applicant's arguments with respect to claims 1-3 have been considered but are moot in view of the new ground(s) of rejection. Applicant has invoked 35 U.S.C. 112 sixth paragraph in relation to the disclosed hydraulic grapple device. As such the Dutton reference teaches a grasping device that meets and exceeds the instant disclosure for a grasping device. Many of the other cited references that are not used in rejections also teach a grasping device as disclosed by applicant.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not

Art Unit: 3652

mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

The prior art made of record and not relied upon, but considered pertinent to applicant's disclosure is:

Redman (1963) a vehicle with a refuse grapple;

Heffington (1973) a vehicle with a refuse grapple;

Carson (1977) a vehicle with a refuse grapple;

Movsesian (1995) a portable hydraulic grapple;

Kalua (1998) a vehicle with a refuse grapple.
